Fantastic News!!!

RM Aviation has joined up with Hull Aero Club and is now based at Beverley Airfield near Hull.

Hull Aero Club, probably the friendliest Airfield you're likely to visit, is looking to promote all aspects of aviation and RM Aviation is proud to be involved with the team at Beverley.

[Click to visit Hull Aero Club site.](#)

Microlight Training is available seven days a week, dawn till dusk, on both flexwings and fixed-wing aircraft.

Hull Aero Club also provides full training to License on Light Aircraft.

Maintenance facilities are also available with engine servicing by qualified Rotax engineer.

My aim is simple - to provide a first class training facility with customer service and satisfaction a priority.

Please take a look around, check out the map for local directions, and why not take the plunge and book a lesson now? We have introduced an online booking system (the first microlight school in the country to do so) to make the whole process as simple as possible.

If you would like to 'phone for a chat, contact details are here and we look forward to seeing you soon.

Best Regards
